Louisville Manufactures-White Lead and Oil An interesting branch of manufactures which is, as yet, in its infancy in Louisville, is that of the production of white lead, linseed oil, &c. The annual consumption of paints of every descrip tion in this country is hecoming enormous. Each year sees extensive additions made to the buildngs not only in every city, town and village, but on almost every farm and homestead in the conntry. As the population and wealth of the nation ncrease, there is, of course, an enlarged demand for tenements of every kind, accompanied by a greater disposition to construct them of a hetter order, and finish them in a style of elegance materially in advance of the previous prevailing in clinations in that direction. The owners of property in cities, as well as of the substantial rural dwellings now so common throughout the South and West, are generally cognizant of the fact,

and are acting upon the conviction that they can make no investment so profitable as that of prohuildings from the influence of time, and the effects of the weather, hy a liberal and free use of We are sure that if the statistics of this branch of manufacturing, in the various towns and cities

during the past dozen years. That it will increase as rapidly for the future admits of no reasonable doubt, and will, at no very remote time, occupy an important place in all estimates of western There is hut one white lead and linseed oil factory in the city-that of Messrs. Waters & Foxon Main street, between Ninth and Tenth streets. principal huildings are of brick, spacious and

well constructed, and apparently admirably adapted to the purposes for which they were built. The engines, machinery, power presses, and fixtures of all kinds, are new, and seem well suited to the different parts of the work. Withon professing to have any special knowledge of what is best in the way of apparatus, &c., for this particular kind of manufacture, we confess we do not see how any improvement could be made that would give greater facilities to the work, or cheapen, or render it in any way more

The proprietors inform us that in the white lead department of their factory, they consume about five hundred tons of raw material, and produce from forty-five to fifty thousand kegs of white lead, five thousand kegs of zinc white, and large quantities of har lead, &c., annually. Their aupplies of pig lead are purchased in Galena and St. Louis. None but the softest and hest article of Galena is used in making white lead.

In the oil department they use, annually, about 80,000 gallens of oil, and about 800 tons of oil cake. The oil cake is mostly sold for the London market. It is worth there, about \$50 per ton, and something like half that price here. It is a favorite article with the English farmera, who use immense quantities of it in feeding cattle. The farmers in this part of the country have not learned, or do not fully appreciate its value for that purpose. But in English farming and cattle feeding, oil cake is justly regarded as heing the cheapest and most valuable food that can he had for stock. So far from the oil manufactured in this mill heing sufficient to supply their trade, the proprietors are compelled to hny in other markets, as much oil as they manufacture, to enable them to meet the wants of their customers.

Their trade is increasing rapidly, and seems susceptible of enlargement to almost any Their sales of lead and are principally made to their customers in Kentncky, Indiana, and Tennessee, but they are beginning to sell to almost every section in the sonth, and expect their trade in that direction to increase very rapidly. The opening of the Nashville Railroad will give an additional stimulus to their business, as it will render access to this market at all times easy and certain, to a large aection of Kentucky and Tennessee, that can only get goods at seasons when the small rivers in those neighborhoods are navigable. The conout about four hundred dollars per week for wages. They say they have every facility of location or otherwise, for obtaining enpplies of raw material, and for manufacturing cheaply

and can compete successfully with any establishment of the kind, east or west. The proprietors have their office at their factory, and are at all times ready to receive and fill orders for their goods.

THE LATEST OPPOSITION CONVENTION-GIBSON MALLORY AND PENNEBAKER SPEAK.—The brethren held a convention at Mozart Hall, en Saturday, to nominate two candidates for the Legislature for Jefferson county. Mr. Daniel M. Jones was selected as Chairman, and another of that family-

Jack, the cleverest of them all-acted as Secretary. The announcement of ex-Governor Merriweth and Samuel Geiger as Democratic candidates threw a damper over the Opposition, and they encountered great difficulty in prevailing on two persons to submit to the ordeal of sacrifice. The Chairman, on taking the stand, indulged in a few remarks. He said he was going to work for Capt. Pennehaker, their candidate for the Senate, against Lem. Hvatt, but he thought it was mighty had nomination. Considering that the Captain was present, this was rather personal and cool-cool as ice. No one wanted to run. At one stage of the proceedings, Gihson Mal-

ory, who had been overslanghed in the Senatorial Convention, was put in nomination. This he peremptorily declined, and left. Subsequently, Mr. Chas. U. Shreve suggested that probably, if the nomination were tendered by acclamation, Mallory would accept. The Chairman thought it might heal his wound, and they unanimously voted the Honorable ex-Senator might run, and a committee were sent out to ascertain his feelings on the subject. They returned with him, and he again refused the proferred honor. In the remarks he submitted, Mr. Mallory commented unfavorably, and in plain terms, on the political aggling of our pigeon-shooting friend, Colonel Blanton Drincan, who has gone to see a hattle in Europe. But Mallory wouldn't run, not a hit

In the absence of the committee, a hallot was taken for the other candidate, which resulted in the choice of Thos. P. Camp by a vote of \$4-0. C. Curry receiving 10, Dr. McMartry 8.

Capt. Pennebaker, who was called on for speech, said the nomination for Senator was a surprise, and unexpected. He had not sought it, nor would he decline it. Whatever bickerings or ill feeling might have been caused by the use of to respond to the honor of the nomination hy waring the standard right worthily-and he would do anything to win that hecame an honorable man, even to hush-whacking it. Jefferson county, he said, if properly organized, would give a maority for the Opposition. The Seventh and Eighth Wards would roll up from 300 to 400 majority so there could be no doubt of his success. Capt didn't know exactly whether national politics or State policy, or both, would govern the canvass, but he reckoned as Davy Merriwether was in the field, hs (P.) would have to hreak a lance at every point. He said Gov. Merriwether bad never been heaten in Jesseraon county. In this he is mistaken; the Governor was once hy hard work. But he also said the Governor would he licked this time-and that is a still greater mistake. The Captain's speech didn't make the faith ful at all "enthocsiastic."

The convention concluded their business hy ominating Dr. McMurtry without a hallot, al though Curry had the most friends, according to the first show of bands. And then the most sensible thing of the day was done-the convention adjourned.

FIRE INSURANCE.—As we predicted some months ince, the underwriters are rapidly reducing the premium charged for fire risks on property and nerchandise in this city. An agent for a foreign curing the best materials, and protecting their office doing business here gives notice that he will take risks at much lower rates than have heretofore been charged, "believing the present fire organization to justify as low rates as any charged in other cities."

The publication of the report of the Chief of the of the West, were collected, and the particulars | Fire Department will show the immense advancorrectly ascertained, it would be found that the tages resulting from the introduction of the steam fire engine and a paid fire department. That report is looked for with anxiety, and should be made public without further delay. We hope, as soon as the Water Works are completed and an abundant supply of water is brought to the city, that the regular rates of insurance on good meta roof buildings will go down as low as they are in Philadelphia where, we are informed, they are not

over three-eighths to one-half per cent. The citizens of Louisville are greatly indehted to James Speed, Esq., and the late Wm. Atkinson, for the introduction of the steam fire engine and the paid fire department. Those gentlemen, six Aldermen, and the latter in the Common Council. advocated with all their power, and finally carried against strong opposition in both Boards, the proposition to construct a steam fire engine, which was done under contract by Mr. John Lawson. That engine, it is true, proved a failure, but it is vocates of this important reform in the fire de partment of the city, and to them helongs the honor of having first brought forward and sustained the theory, which, in a more perfected form, is now producing such important and bene

hour, two watchful guardians of the city, in spying out what was to he seen, caught a negro hoy and a white woman together in a house on the alley between Third and Fourth and Main and Market streets. The fix in which they were diacovered left no doubt of their intentions. As the officers entered the room, the darkey bounced up and en desvored to escape hy jumping from the second story window. He did jamp, but lit on a negro woman, and hoth came to the ground heavily. The woman was hadly hurt, but the ashle Lotha rio was uninjured. A Curious Case .-- Some two months since, a man who kept a fancy shop on Fonrth street, was hadly whipped hy a man whose wife had been insulted hy the shop-keeper. The latter closed bis store, left the city, and bas never heen back. A few days since he wrote to a person in this city, who was comparatively a stranger to him, to sell out his remaining stock and transmit the proceeds. On examining the money drawer in the store, the person who was acting as his agent found upwards of \$200 in money, which the shop-keeper had left behind, and to which he made no reference in bis instructions concerning his business. Mob Law in Lincoln County—Murderer Arrested and Hung.

We learn that a man named Jasper Rouzy was nng by a mob, near Stanford, Lincoln county, on Saturday morning last. Ronzy was a mau of desperate character, and had in May last shot James Oldham, in Milledgeville. Lincoln county. Although a heavy reward was offered for his apprehension, he remained at large until last Monday, when he was arrested at Bradfordsville, Marion county, and immediately conveyed to Stanford and lodged in jail. It is said that when arrested he desired to he killed on the spot, as he knew he would he hung if carried to Stanford.

On Saturday morning, ahout two o'clock, a moh f nearly one bundred persons collected around the jail, made an attack upon 1t, and seized the prisoner. They then conveyed him a short dissance into the woods and hung him on a tree .-Before bis execution he desired that his body might be given to his wife.

Whilst at large in Marion county, Rouzy comnitted numerous petty outrages, and was attempting to perpetrate a theft when finally arrested .-He has at last paid the forfeit of his crimes by an ignominious and terrible death,

LARGE ROBBERY-FLIGHT OF THE THIRF .- On Thursday evening R. Ragland, of Spence county, was rohhed in Taylorsvills, Ky., of \$800 iu money and nearly \$2000 in notes of hand. He went into the barber shop of George Braum, and while resting his wearied limbs on a couch, fell into a slumber which lusted for several hours. When he awoke he discovered that his money was missing, and the barber too. The latter left in such a way that suspicion was naturally directed to him as the robher. He was pursue to this city, and policeman Bligh set on his track. Asleuth hound trailing its prey could not be more sure of its victim.

On Saturdsy, the officer observed a man enter harber shop, on Third street, near the river, who suited the description. He followed in not yet sure of his man, and tipping a wink to the proprietor, said to the man: "Halloo! I thought left you in Taylorsville." "Why, yes," said his name, ha was not responsible. He intended Branm, coloring, for it was him, "but I come down yesterday. Did you hring a drove of cat tle down?" He took Bligh for a cattle drover After learning where he boarded, the officer "pulled" his man, and conducted him to jail .-He had hut \$67 in money on his person. The stolen money was principally in \$20 gold pieces Braum on Friday changed two pieces of gold of this denomination for paper money, at Peter Merkle's. A \$5 bill of Rsgland's money was found on him and identified. Branm will be re turned to the Spencer county jail to day.

> THEATER .- The famous Ravels continue their engagement for another week at the Theater, giving to-night two of their best pantomimes .-The full force of the company will be brought to bear on the first piece, which is entitled the "Golden Egg," and contains many of their finest tricks and transformations. Of course, Gabriel Ravel will have a large share of the humor of the performance, as in that line be is inimitable, and still hears off the palm, in spite of severe competition. The second piece is entitled "Le Diable a Quatre," ln which most of the company join .-Mademoiselle Zanfretti will give her wonderful tight rope performance, which has excited the admirstien and astonishment of every spectator. No woman in the world has ever equalled her performance, and no doubt she would compete successfully with Mons. Blondin, who has lately crossed Niagara river on a tight rope.

ROBBERY IN GRAY'S ALLEY .- Richard Vann has a weakness like all men, and his is to potate. On Saturday, Dick, like him whose surname is Swiveller, passed "the rosy" often, and bis worsbip at the shrine of Bacchus confused his ideas, and led him into the companionship of evil men .-These consisted of Pat. Holmes. John Noon and Thomas Johnston. They repaired to Gray's alley, where they imbihed, and one of Richard's boon companions, combining business with pleasure, abstracted his pocket book and \$40 while they were drinking. Somewhat sobered by his lose, the victim sought Chief Ray, who arrested the trio upon his statement, the truth of which will be determined by judicial examination. The

There, while his friend slumbered from the effects of numerous potations, Hanley, it is said, abstracted \$4 in good noney from the pocket of said aleeper. At least on that charge he was committed to prison.

A negro girl with an admixture of Caucas ian blood in her veins, on Saturday, absconded rom her master, C. F. Johnson, a Southener, who boards at one ol our hotels. Pursuit was nade, and the girl was caught in Portland hy Policeman Weatherford. She was dressed in hoy's clothes when arrested, which were doubtless furnished her. wounded. Elias White, a free negro, was arrested or Saturday, on the steamhoat J. K. Bell, for mor tally stahhing one Williams, a free negro, in Cin cinnati, several weeks since. A policeman from that place told him the man was dead, and the saucy rascal said, "I don't care a d-n; it don't interest me any." He will go to the Queen City to-day in charge of an officer.

Peter Fox, a stone msson, was drowned while hathing in the river at this point on Satur day night. It is supposed he was affected with cramp. He has a family in St. Louis. Thos. Lowry, an omnihus driver, was drowned near the ferry landing, in Jeffersonville, on Saturday even ing. The bodies of both men were recovered.

A FEARFUL FALL.-We learn from the clerk o named Walker fell from a third atory window of a house in Columbus, Ky., ou Thursday evening, and met instant death hy the fall. It was at meeting of Odd Fellows, and it was probably the odge room from where he fell.

We learn from the Bowling-Green Stand ard, that the house in which one of its editors-Mr. Gannaway - resided, helonging to Frank Cook, Esq., was destroyed by fire on Thursday cloths, and other articles of minor value. THE WAR.

[Special Dispatch to the Cincinnati Commercial.] Further Details of Foreign News—How the Army Moves—The Secrety of the Emperor—Frepara-tions for Taking the Quaerolateral.

The following is from Russell's latest letter: Bascia, June 19.—The march of the Allies is not unlike the movements of a gigantic boa constrictor following its prey. Coil after coil of its enormons body rolls forward in uninterrupted succession, until it suddenly stops. The prey must be near, for it entwines its coils as close as its massive mobility admits. must he near, for it entwines its coils as close as its massive mobility admits, as if preparing for the spring. This is just at this moment the attitude. The mass of the body close together, and at rest apparently, and only the head stretched ont, as if to measure the distance. It is the concentration of strength and energy before employing it. The greatest part of the army is collecting it. ing it. The greatest part of the army is collected within a comparatively small space, from which it can throw itself, in a memsnt's notice, in any direction where its presence might be required. A council of war is held to-day, to determine this, or rather to discuss the matter, for there is only one person who decides, and that is the Commander in Chief of the Allied armies, and sudden and unexpected are these decisions. To he sure, nobody knows where he will pass the night. Nobody knows where he is going. The night. Nohody knows where he is going. The order comes at the last moment, and every one nust be off.

This secrecy is so striking, that there is in the army a saying, "Il fait la guerre en conspirateur," and the saying is true enough. No conspirator ever kept his plans closer. Indeed, now and then movements and counter-movements are mads, people think, especially to mislead and puzzle all calculations. Of one thing you may be certain, however, that the famous quadrilateral had heen the object of study long before the war had heen the object of study long before the war commenced. Its strength is not underrated, and means are provided accordingly, adequate to the work. What these means are, of course, you don't expect me to tell. But you may prepare yourself for something astonishing and most un-

THE TRIBUNE ON THE WAR NEWS The Tribune sums up the news from the war as

England, as well as here, seems to have been that the allies would not fight a great battle until the corps of Prince Napoleon, marching from Tuscany, had arrived to attack the Austrians in the rear, while it was supposed a flotilla would be launched on the lake of Garda to enable the allies also to make a flank attack in that quarter. Napoleon III has, however, waited for none of these things, but has fought and won the fight. It is things, but has fought and won the fight. It is also evident, from the correspondence from the allied camp, of which we elsewhere give all that is important, that to fight was the only practica-hle course. Delay would have checked the victo-rions impulse of the allied troops, and would have given the Austrians opportunities to beat them by superiority in numbers in small encounters.— In the movements of the Austrian army the same vascillating indecision is apparent under Schlick, which had hefore resulted in the defeat and dis-

They at first prepared for hattle on the line from Lonato to Castiglione, San Cassiano, Carriana and Volta. Here a plateau gradually rises toward the Lake and the Mincio, offering a succession of excellent positions, each stronger and more concentrated than the preceding one, so that the conquest of the edge of the plateau would not constitute a victory, but only the first act of a hattle. Their right wing was covered by the Lake. Their left was drawn back considerably, leaving unguarded nearly ten miles of the line of the Mincio. But this, instead of being a disad-rantage, was, in fact, the finest leature of the position, from the circumstance that heyond the Mincio lay the dangerous ground enclosed between the four fortresses into which an enemy could not venture unless he possessed a great un-merical superiority. The line of the Mincio heing mmanded at its southern extremity by Mantua and the ground beyond the Mincio belonging to the spheres of action of hoth Manua and Verona, every attempt to treat the Austrians, in the position on the plateau, with contempt, hy marching past them toward the Mincio, would soon have been brought to a stand still. The advancing army would have seen its com-munications annihilated without being able to endanger those of the Austrians. But the most

dangerous part of such a move would have been, that it must have been done under the eyes of the Austrians on the plateau, who would have nothwould have been fought by the allies under tremendous disadvantage; and might have ended in a second Austerlitz, with the parts reversed.— Such was the position which the Austrians had assumed, and they had it in the further advantage of knowing the whole ground, from the fact that for years it has been the scene of their annual army exercises carried out upon the largest scale As we have said, it was carefully prepared for the eason that, in a military point of view, is utter inexplicable, they ahandoned the ground, and areated hag and haggage across the Mincio, ble snhmission, our community has lost one of

where, on the 24th, they are attacked and finally in the plan of the campaign had anything to do with the action of Prussia, which power is said to consider the quadrangle of the Mincio and Adige as in some work a part of the defenses of Germany, is a question on which we may hope or more light hereafter. One thing, however, pretty certain with regard to Prussia, and that is that her attitude must prevent Louis Napoleon from drawing many more troops from France to taly. As our readers are already aware, that wer has moholized six out of her nine army power has mobolized six out of her hine army corps—that is, she has called into service the Landwehr, consisting of addiers helonging to those corps which, having completed three years of regular service, are discharged on indefinite furlough. Of these six army corps, five are to take a position on the lower and middle Rhine. Thus some one hundred and seventy thousand Prussians must at about the present date be in line hetween Cohlentz and Mentz; and, no donht, two other Federal corps, that of Bavaria, and that of Baden Wurtemberg and Hesse Darmstadi, will also take their position in Baden and the Palatinate, making one hundred to one hundred and twenty thousand men in addition. Against such forces, Napoleon III will require almost every man new at his disposal in France. In this case, he may find it advisable to have re-course to a Hungarian insurrection, and to the services of Kossuth, though we may be pretty sure that be will not call such agencies into requi-sition until he is compelled.

That Prussia now actually intends to take part in the war is very donhiful, but it will not be so easy for her to avoid it. Her military system, hy naking soldiers of the whole adult able-bodie population, pnts such a strain npon the nation from the moment the Landwehr even of the first evy is called out, that the country cannot affor o stand by with arms grounded for any length of time. At the present moment, all able-hodied nales from twenty to thirty-two years of age, are nnder arms, in six provinces out of eight. The derangement caused by this in the whole com-mercial and industrial organization of Prussia is enormous, and the country can only stand it on condition that the men are led before the enemy without delay. The men themselves could not stand it. In a couple of months the whole army would he in a state of mutiny. Besides this, the national feeling is running so high in Germany, that the latter is the course of the c national feeling is running so high in Germany, that Prussia, now that she has gone so far, eanot retreat. The recollections of the peace of Basle, and of the irresolution of 1905 and 1906, and of the Confederation of the Rhine, are atill and of the Confederation of the states, as a vivid, that the Germans are determined not to allow themselves now to be heaten six gly by their wary opponent. The Prussian Government cannot master this feeling. It may attempt to direct it, but if it does so, it is hound hand and foot to the movement, and every trace of wavering will be considered as treason and will recognize the content of the be considered as treason, and will recoil upon the waverer. There will no doubt be attempts at ne-gotiation, but all parties are now so engaged that no road out of the labyrinth appears open in any

[Special Dispatch to the Cincinnati Gasette.] The correspondent of the London Times writes As I had mentioned Garihaldi and his corps, it will perhaps interest you to hear how he came from Bergamo to Brescia. The Austrians had scarcely withdrawn from Bergamo, when a measure was caught on the road who hrought orders from the headquarters to hold Bergamo at any price, if it had not been given up yet. It would have been rather awkward had the order come before, for Garibaldi, without any cannon, would scarcely have thought of attacking the Austrians in a town enclosed by bigh ramparts.

Prof. Wise Accounts for the Failure of his Balleon Yoyage, and Defines His Pontion. [Special Dispatch to the Cincinnati Commercial.]

NEW YORK, July 3. Mr. Wise, the balloonist, bas written a letter. which will app which he says: will appear in to morrow's Trihune,

"There is a current of air blowing from east to est continually, and this current runs never less west continuity, and this current runs never less than fifty miles an hour-oftener sixty, sevenly, and eighty. Prof. Henry thinks it is the return current of the trade winds. As we ascend higher in the current it runs faster, until we find it changing a little south of east; the lower current near the earth runs toward the north of east. I have found these entrents at all times of the year, from the lat of April to the 12th of December. rom the 1st of April to the 12th of Decer In my correspondence with Chas. Green, of London, a scientific eronaut of much experience, flears from him that these currents exist likewise in Enrope. From my experience of finding them thirty-nine times out of forty trials, I content hat regular and precise voyages can be made from west to east, and to places 15 and 20 de-grees north of east from the point of starting — Why, then, is it asked, did we not sail to New York and deliver our express hag? It is a very rational inquiry, and deserves a rational explanation. It could have been done, and should have been done. The reason why it was not done is,

some of our party did not provide themselves with extra clothing. Immediately after leaving St. Louis I took the balloon to an altitude at which she was making due east. In this current we sailed until some of ny companions shivered with cold so that the alloon quivered with the tremor. I also told Lakes, as it was coming from the sonthwest; but to this it was answered that we could cross the Lakes if we had ballast enough when we got to them. We finally agreed upon that plan, and to make the voyage one of distance and experiments. My purpose was simply to make a long voyage from west to east, and in that voyage earn what may be done systematically with had cons. I am now convinced that we can go from the Louis to Baltimore, Philadelphia and New York city with balloons, with system and precision. I hold, and am ready to demonstrate as soon as I can raise six thousand dollars, that we can sail from any city to Great Britain with system and precision. This we can do with our present knowledge of hallooning. An exhibition of a very remarkable and unnut ural character attracted a small hut highly respectable audience at the Melodeon on Thursda evening last. A young man by the name of Jan. In all this but very little hlood was drawn. He also offered to drive a knife through each leg and hang himself from the wall, which the andience mercifully excused him form doing feeling activited that he assets. from doing, feeling antisfied that he could accomplish whatever he proposed. About the whole procedure there was no sort of humbny. as the eyes of divers gentlemen, who were upon the stand, were steadily fixed upon him, and any "unbelieving Thomas"—had an opportunty to touch the knife blade on the opposite side to that person, which was probably more for show than anything else, as they could effect nothing. Mr. Steavens looks to be not more than twenty or twenty-one years of age. Before closing, he proposed to operate in a similar manner upon any one of the audience, agreeing to forfeit \$1000 if he inflicted pain. This, however, was prudently declined. The Journal's Witnesses Against Magoffin. The Louisville Journal is very much troubled about Magoffin's position on the slavery question The editor don't understand how such protection papers as the Louisville Courier, Maysville Express, and Paducah Herald can support Beriah.. He considers Magossin a straight-out, anti-protection, squatter sovereignty Democrat, who would rather inaugurate civil war in this country than to ask Congress to protect alavery in the Terri-

teries. He uses the following language with regard to our candidate for Gubernatorial honors: Mr. Magotan has defined his position unequiv Mr. Magolin Acc denied his position unequivocally. He now proclaims, and proclaims emphatically, that sooner than have Congress interpose for the protection of the adjudicated rights of slave property in the Territories of the United States, he would invoke civil war—would inaugurate the terrible rule of the rifle and the hayo-

has set forth his position in his own words, which Here is what Magoffin says :

"That Congress has the power to protect while it cannot prombit slavery in the Territories; that the Territorial Legislature, as its agent, cannot exclude or abolish slavery, directly or ind rectly, by norriendly legislation; that such legislation is void, and would be declared unconstitutional by the Federal courts; that it is the duty of the Terr torial Legislature to protect slave property, and property of all kinds; that the rights of property of all kinds are under the protection of the government, the Constitution and the laws; that our rights and remedies seem to be now complete in the Territories, and nothing has occurred to show their inadequacy; that the Democratic party has brought us to this position of safety against all the efforts of the Opposition, entertaining differ-ent opinions on the subject, and forming combinations to destroy it; that the struggles and vio tories over other parties have clearly shown that ours is the only party capable of protecting our rights, or guarding them in the future; and if it necessary to pass laws to enforce the de crees of the judiciary, or even to call out troops, that it would be the duty of the government to do

nal's wilnesses are not worthy of belief.

And while upon this subject we hesitate not to say, that we believe Magoffin to be much sounder them in one place, which loosens their fastenings on the slavery question than Bell. It is onr cpinion that Beil, if not an Emancipationist, is a man of decided emancipation proclivities, while Mugoffin is beyond all question a true pro-slavery man. Bell did all he could to elect Avlett Buckner to Congress, when Buckner was known to be in faver of excluding slavery from Utah and New Mexico, at the very time too when he could, if will. We will het our bottom dollar en Magoffin's doing whatever a true pro-slavery Governor of in so lair a way for a rapid recovery. Kentucky should do in hehalf of slavery in this State, or ln env of the Territories.

Would a friend on whom the South could rely advise a President not to veto the Wilmot Proviso? And finally, can be be a friend to the South who holds that Southerners cannot go with their alaves into Territories of the United States because he and the Emigrant Aid Societies of the North are pleased to denominate the public domain free soil? Away with all such friends to the South. Abelitiondom, and Black they will, no doubt, be found agreeable to Col. Republicandom, and Free Niggerdom, are full of Holt, and, if not, will be altered to suit both parsuch friends to the South. If the editor of the ties. Journal can't find a better friend to the South than Green Adams to send to Congress, he had

better quit politics. The county of Jefferson, including the city of Louisville, is entitled to six Representatives and two Senators in the next Legislature. The Detwo Senators in the next Legislature. The Democracy have made nominations for each of these places, except a Senator for the first six wards of the city, and Representatives for the Third and Fourth, and Seventh and Eighth Wards. Before the present week ends the ticket will be complete, and the little army of eight in the field.

The Democratic nominations thus far are per feetly satisfactory. The selections have been good in every instance, and the men chosen ought to be elected. If they are not successful, it will be the fault of voters who do not take enough interest in such matters to put the best men in the offices they ought to fill. The following is our

The Journal on Holt and other Matters. The Journal, to prove Col. Holt a political sinner, like other polemics, goes back to "original sin" and the fall of Adam. It tries to avoid our punishment by punning. This won't do, however. From the first Governor Adam of Eden, to the last Governor Adams of South Carolina, is a long jump, but, then, the editor gives all creation a side-wiper as he goes. Soft-shells and Corwin, Blanton Duncan and Icarus, Donglas and fig leaves, &c., &c. He may prove "original sin" on Col. Holt by the first named Adam, but if so, we undertake to prove "total depravity" on him by the other great authority, the last named Adams. The Democracy may have committed some its renegades "its fruits." It certainly was a miafortnne that Andrew Jackson Donelson, Sumner and Wilmot, and others of a like kidney ever

belonged to it, but it is a little too impudent to call them "the fruits of the Democracy." But if it is responsible for all of these as its fruits," in about two years more, the Journal by that time having abandoned the "Opposition' and joined the "Proposition" or "Composition" party, will be charging the Democracy with the sins of Joshna Bell or S. S. Nicholas. We prophecy the "Proposition" party because we suppose it will be based on that proposition, for all men to unite without a sacrifice of principle on the part of any-Giddings included. But "Composition" would not be a bad name either, when we recollect the construction of Nebuchadnezzer's statue. No! Hale, and Wilmot, and Company, were stray goats that come over from the left into the sheep pen and were turned out. But, thank Ged! the Democracy never had Seward there nor the editor of the Journal.

Col. Holt and the Journal,

Col. Holt seems to trouble the Journal very much. It gave him another splashing last Friday. It is quite willing to drop the issue between Col. Holt and his prosecutor. It has, perhaps, on reconsideration, concluded that "what is sauce for the goose is sauce for the gander." It attempted to fix Abolitionism on Col. Holt, be canse he did not engage in an attempt to keep California out of the Union until she would come in as a slave State. But he could not answer the question whether he would not have acted exactly as Col. Holt did in the premises. He tried to avoid the answer on the ground that he is not a Kentuckian born. But, we assure him, we are not for any limitation of the franchise of speaking the truth out in meeting. He has a constitution al right to do so. But if he doubts it, we will naturalise him. We always were opposed to these know Nothing restrictions. We assure him, if he will speak right out, no one shall hurt him. We regret that we frightened him so badly about it that he had to drop the subject, and if Now, all we have to say, in reply to this, is that we can only coax and cajole him into one hearty Magottin has defined his own position on the outborst of his true and real sentiments on the comings in politics. We suspect that if Colonel have been published in every paper in the State. Holt's critic were to answer the question squarely, he would say that he would not have gone for ditional provise that all of Utah and New Mexico should be made into free States.

> We find the Courier supporting Col. Holt for Congress, who declared himself ready and "willing, God knows! to vote for Douglas" on his ecord, after the publication of the letter .- Lou

Col. Holt put in an important proviso which you omit. He said he would support Douglas if he was the nominee of the Charleston Conven ion. What, then, are the chances of Douglas being supported by Holt? Will Douglas retract his Freeport speech? Or will the Charleston Convention nominate Douglas with his insulting letter besore it? We think Col. Holt may safely say he will support Donglas when he is nominated by the Charleston Convention, for Donglas will either have to stand square on the slavery platform that will be demanded of We prefer then this declaration of Mr. Magoffin | that Convention, or not be nominated. The himself on this subject to the charge of the Jour- chances are a thousand to one that Douglas will nal made upon the testimony of interested wit. not recant, and that he will not be nominated nesses. The Journal can find no witnesses to If Douglas had not had his speeches in the Illinois prove its charge against Magoffin except those campaign reported, there would be some chance whom Bell has denonneed as suborners of the for him. But it was necessary to report his Judiciary, and enemies of civil liberty. If, there- speeches to secure his election to the U.S. Senate, fore, Bell was right in his denunciation, and he and thereby a record was made np against him is good enough authority in this case, the Jour- which he can't erace, and with which he can't get through the Charleston Convention. > COL. BOYD AT HOME.—Hon. Linn Boyd, accom-panied by his family, reached his home near this city yesterday morning. The trip from Philadel-phia to Cincinnati was made by railroad, and from Cincinnati to Paducah by steamboat. The ourney by railroad was made by the Colone upon his bed, being unable to undergo the fatigue of sitting up that length of time. His friends, however, will be gratified to learn that he stood the trip well, and is decidedly improved by it We saw him at 8 o'clock yesterday morning immediately alter he reached his residence, and we were astonished to find him looking so well, and in so lair a way for a rapid recovery. He is slowly but surely regaining his strength, and we confidently hope that a few weeks of the pure and healthful air of his "Old Kentucky home," will fully restore him to his wonted vigor.

Green Adams, the Opposition candidate for at Paducah, to his old friends of the 1st district but his mere presence amongst them will inspire the Democracy of the "Invincible First" with renewed zeal in their sacred cause.

Col. Boyd has been afflicted with a complica-tion of the most painful diseases, which have racked him with agonizing misery, prevented him from sleeping at times for 43 hours, and utterly record of this gentleman on the rights of the South. NOTICES.

REDUCTION IN PRICES OF DRY GOODS .- As the season is now advancing toward a close for the sale of Summer Dress Goods, Mesers. Martin & Penton, have, in accordance with their usual custom, marked down the prices of their entire stock of Robes, Bereges, Organdies, Lawns, Jaconets, Swisses, Purasols, Fans, Net Mitts, elegant Lace Mantles and Boumous, Shawls, Selke, Chintzs-in a word, everything appertaining to a Summer Stock of Dry Goods, in order that room may be made for their fall importations, which we learn will be superior. Purchasers may, therefore, rely upon securing Goods, and desirable Goods, at low figures. Call at Martin and Penton's, 96 faults, but for what reason does the Journal call Fourth street, between Market and Jefferson, one door from Market.

> PULMONARY CONSUMPTION being primarily and essentially due to a disordered nutrition, can be rationally attacked only by a medicine which renovates the nutritive powers. Such a medicine is the PERUVIAN SYRUP, whose chief ingredient acts directly and immediately on the blood, and arrests the disease safely and surely.

BALTIMORE, July 15, 1854. I was suffering with a severe Catarrhal Cough, ccompanied by Night Sweats, Loss of Appetite, and great Debility, which was daily increasing. In this state I commenced taking the Peruvia Syrnp. In a few days, and before I had used the second bottle, my cough lessened night sweats ceased, appetite was restored, and with it strength and vigor beyond what I had enjoyed for ten years, being able to walk several miles each day without fatigue, while hitherto I could walk only a short distance. A NEW SEIRT THAT HAS NO EQUAL .- J. M. Rob nson & Co. have just introduced a new article, the Woven Extension Skeleton Skirt, with adjustable watch spring hastle-made without a stich or clasp of any kind. They will be found to obviate the great objections to metalic-fastened, or sewed skirts, which are continually cutting the tapes or ripping, the hoops, by this new method, being woven in where the tapes are made. They will, no doubt, soon supercede all others, as they will prove to be the most durable skirt ever yet offered, and as low as any made of the BEST tempered watch spring steel.

They are also still manufacturing, in large quantities, their celebrated Double Extension Patent Brustle Skirt, for which there has been such great demand. j20 d1m

Five Per Cent, Dividend New York, July 9.—A five per cent dividend is announced to day, by the Cleveland, Columbus and Cinciunati Railroald Company, payable August 1st, at the office of the United States Frust Company. Annexed is an official state ment of the business of the half year: Gross earnings for six months ending June 0th, 1859, \$456,796 89; expenses for the same time, iucluding taxes, \$246,925 26; net for six months, \$240.871 13; five per cent. dividend declared, July 6, 1839, \$237,805; surplus, \$306,618. Business on corn exchange has been active this week, being influenced, in a great measure, by exciting European war news.

The fluctuations in breadstuffs have been quite

sudden at times, especially in flour, but at the the close, the dull accounts from Liverpool seem to have a corresponding effect here. Speculation in provisions has received little or no encourage ment from Liverpool advices, and the general tendency of the market has been downward, with nly occasional buoyancy. The business in pro-uce has been stimulated almost entirely by the ome demand, the shipping inquiry being quite

The Pacific Mail Steamship Company has completed the purchase of the Collins steamers, viz. The Adriatic, Baltic and Atlantic. It is the intention of the Company to run these boats, on the completion of their contract with M. O. It is understood that uniform passages of eighteen days will be made from New York to Sau Francisco.

The India Rubber Case.

BALTIMORE, July 9.—The great ludia rubber case of Horace H. Day and others against John Stillman, is now on trial in the U. S. Circuit Court, in this city, before Judge Giles. This case, with others involving the same issues, is now under-going a final hearing, before going to the Supreme Court of the U.S., on claim of plaintiff to the exclusive right to manufacture and sell what is technically known as woven elastic India rubber goods. A preliminary injuction had previously been granted in all the cases in this district, and the argument now pending is to have a perma-nent injunction issued, wholly restraining the defendants from vending vulcanized rubber

But, I am unselfish (!) enough to come out o dream-land and gossip with my city friends, and urge them to repair instanter to this lotus land, and share with me the delicious joys that beguile the hours at Estill.

Radiantly and luxuriously June has blossome into July, crowning with rare beauties our Utopian retreat. All over the fields the nearly elder lowers are blooming, and the air is redolent of new mown hay. Down in the valleys the lilies wave on the banks of bright little streams, that sing soft summer songs. On the ciffs the ferns "shake their green heads in the wind," and the lack berries are in prime flavor.

In doors, bright faces and genial spirits make sunshine and beauty. The days, quietly happy, are closed by the cherry "hop" in the ball-room. Rhinebold's famous band discourses delicious nusic. (Pretty young belles, who have Estill memories, do you remember, not many years aince, the exquisite strains that fell dreamily on your ears, as you listened to words that were sweeter music still?) Their performance of plaintive and sentimental airs is artistically and tenderly beau tiful and suggestive, as I have ever heard, while the waltzes are delicious enough to make very the waltzes are delicious enough to make very possible the legend of the beautiful princess, who, to the sound of derictionally entrancing music, waltzed away her young life.

Conspicuous amongst our public spirited citiens, Dr. John M. Taylor, R. Lee, Dr. N. G. Duerno, T. R. Pinkston, A. Lawrence, Jas. Garriott, M. Rice, &c., took the affair in hand, and most ithfully and satisfactorily did they acquit them-The beautiful grove selected for the oc casion, the property of our townsman, Wm. A. Crider, Esq., was all that could be desired. An extensive arbor for the devotees of Ternsichore. and every conceivable necessary arrangement were in readiness. The morning was truly invi-ting—the air cool and bracing, and the sun rose with more than its usual gorgeous magnificence, cornishing hill and dale, mountain and valley with its golden hues. At an early hour the surconnding hills reverberated to the sound of martial music, and by 9 o'clock the nigathering commenced, and carriages and in gathering commenced, and carriages and wag ns, pedestrians and equestrians, crowded every high-way and by-way leading to our pleasant little village, so beautifully situated on the banks of la helle retiere, and thence to the picturesque and charming grounds. By 10 o'clock the spacious and beautiful grove was alive with animated nature. Banners floated in the breeze, and the drive and the drive and the space of expect music filled the and the dying cadences of sweet music filled the air. The programme was announced by the chief marshal, Dr. R. H. G. Duerson. The reading of the Declaration of Independence, by Colonel F. Evans, was a creditable performance, and the prefatory remarks were appropriate and in taste. Of the oration, by Col. Ben. Selby, of grange, we must not attempt a description. too sensibly our inability to do anything like instice to this masterly effort of Col. Selby, who grasped the subject with a master's hand, and ld the listless attention of his large audier for more than fifty minutes by his beautiful and thrilling eloquence, and bold and rich imagery.—Suffice, it was in his happiest vein. Dinner not being ready, "music arose with its voluptuous swell," and the "poetry of motion"

The daughters of Oldham were alone in their ory, having no competitors from the adjoining counties. They were contending with their sta-ters, and felt no rivalry. "On went the dance," as "bright the sun shone o'er fair women and brave men." Miss Sue B., of Saltille, so counties. They were contending with their siaters, and felt uo rivalry. "On went the dance," as "bright the sun shone o'er fair women and brave men." Miss Sue B., of Saltille, so winning in her manners, so sylph-like and graceful, if not the center of attraction, she at least captivates all who come within her influence; but there is Miss T. T., of L. G., a dangerous competitor, and although it would be impossible to outrival the former, who is not inferior in the graces of the dance, nor mental culture, and withal has as beautiful a pair of eyea as I ever beheld. There goes Miss B., also of L. G., to take her place in the dance. Her dress is plain, but in exquisite taste; her figure faultless, and her every move is the personification of elegance and grace; a bevy of beanx are around her, and their looks would warrant the helief that she was the snn of their terrestial heaven. "On goes the dance." Never assembled in woodland green a gayer nor a happier crowd. Our young bachelor friend, "the Major," (we have but one Major in Oldham) is holding sweet converse with the vivacious Miss C., who attracts much attention, and is one of the prettiest dancers on the ground.

Miss M. Z., of M., "ahe moves in beauty like the night," a queen in that queenly company. Miss T. C., dignified and graceful, not a few have acknowledged the fascinations of her charms. Miss T., with rich auburn heir, end whose merry rioging lengh is heard above the music, dances exquisitely well, and is all life and animation. But the observed of all was, emphatically, the petite Miss C., of L. L. All were cuarmed with the ease and elegance of her manners, and so chaste and beauti'ul was her execution of the "Highland Fling" the admiration of all was unlimited.

At 20 clock the music ceased. The sumptuons repast is enjoyed, and again "on goes the dance" with renewed energy, life and animation. Comspicuous among those who moved with queenly elegance and grace through the mass of the dance, were Miss N. R., as lovely and lovable a woman as one meets with in a month's travel; also Missa Lucia M., and Jennie P. Amid so many forms of human loveliness and beauty, where there is so much to claim our admiration, we feel particularizing some, that we have done an in-ice to othera. To the married ladies, as well justice to othera. To the married ladies, as well as single, who did not participate in the dance, as single, who did not participate in the dance, but who greated the occasion with their presence, and who greatly contributed to the enjoyment and pleasure of the day, we all feel greatly indebted, and teuder our acknowledgments. At 6 o'clock in the beautiful greve where all day long music and myrth resounded, unbroken ailence reigned. The day passed off without a single incident to mar the enjoyment of any.

At night, a gay assemblage collected at the hospitable residence of R. Lee, Eeq., and "tripped on the light fastastic toe" until the "wee hours of morning." Thus was the 4th observed in "WESTPORT."

Naw York, July 9—P. M.

The close of this week brings with it the first indications of a relaxation in the money market, which was expected after the heavy paymente lucident to the lat of July, which has been provided for. The tendency to an increased lease, however, is not deemed enough to affect materially the rates of discount, it manifesting itself chiefly in the regotiation of eail loans. The abatement in the gold export seems to have contributed to the freer supply, and for a temperary use 5½ per cent, has been accepted to day on first class securities; the ruling figure is 6 per cent, at which lenders are more numerous than early in the week. On paper, the rates for long dates are fully susteined, and in most casee rather more desirable lists may be had at 7 per cent, while short bills are etill scarce, and go readily at 606% per cent. The Herald, speaking of the foreign trade at New York, savs: That the importers of this city have been and are overtrading, they will themselves be ready presently to admit. We fear that many a ship icad of goods will, this fall, change owners in the warerooms of our auc-tioneers, at prices by no means such as are expected by nporters and consignees. The prospect is not agree ble, of course, and we are not surprised that the im riers dislike to have it mentioned; but there are the ures—\$73,500,00 of importations at this port in three onths—and this at a time when the West is impoverish-d and living on the future. The country at large is re-lving, plainly enongh; in a year or two, or perhaps boner, even the West will, in all probability, be richer d busier, and more prosperous in every way than it er was; but it is not safe to discount this recovery

ders, considering that this is usually the duliest season in that particular line.
